

6. At the time of the initial incident, Respondent was employed as a Staff Nurse with Baylor University Medical Center, Dallas, Texas, and had been in this position for one (1) year and two (2) months.
7. On or about November 28, 2008 through November 29, 2008, while employed at Baylor University Medical Center, Dallas, Texas, Respondent failed to accurately document on the medication administration record the portion of Methadone that she actually administered to Patient Number 00676225-029 and that the patient spit out and refused the remainder. Although Respondent wasted the remaining Methadone, Respondent failed to ensure that a witness to her wastage was documented in the medical record. Additionally, Respondent did not document in the medical record that the patient was difficult to arouse prior to administering the Methadone, did not notify the physician of the patient's possible over-sedation, and kept in her possession a syringe containing 1 mg of excess Dilaudid left over from an earlier administration. Respondent's conduct resulted in inaccurate and incomplete medical records.
8. In response to the incident in Finding of Fact Number Seven (7), Respondent states that the electronic "check off" for administration did not give option to enter actual amount of dosage, and she didn't document the patient's sedation because it was known by staff and the physician that the patient had been difficult to arouse due to her medication regimen for the prior few days. According to Respondent, it was common practice at the facility for nurses to save medication for the next dose and the unit manager, being aware of the practice, indicated that she was planning to have the practice stopped and to inform nurses that any excess not administered at the time would have to be wasted.
