6. At the time of the initial incident, Respondent was employed as an Emergency Department Manager with Conroe Regional Medical Center, Conroe, Texas, and had been in this position for eight (8) months.
7. On or about October 2011 through December 19, 2011, while employed with Conroe Regional Medical Center, Conroe, Texas, Respondent may have lacked fitness to practice professional nursing due to exhibiting impaired behavior, including but not limited to falling asleep while on duty on numerous occasions. Respondent's condition could have affected her ability to recognize subtle signs, symptoms or changes in patients' conditions, and could have affected her ability to make rational, accurate, and appropriate assessments, judgments, and decisions regarding patient care, thereby placing the patients in potential danger.

8. On or about December 19, 2011, while employed with Conroe Regional Medical Center, Conroe, Texas, Respondent engaged in the intemperate use of Carisoprodol/Meprobamate (Soma) in that she produced a specimen for a drug screen which tested positive for Carisoprodol/Meprobamate (Soma). Unlawful possession of Soma is prohibited by Chapter 481 of the Texas Health & Safety Code (Controlled Substances Act). The use of Soma by a Registered Nurse, while subject to call or duty, could impair the nurse's ability to recognize subtle signs, symptoms or changes in the patient's condition, and could impair the nurse's ability to make rational, accurate, and appropriate assessments, judgments, and decisions regarding patient care, thereby placing the patient in potential danger.
9. Regarding the conduct outlined in Finding of Fact Number Seven (7), Respondent states that she was made aware of only two incidents in which she allegedly fell asleep during her shift. She states that one of the incidents occurred in either October or November of 2011, and the second on or about December 13, 2011, when she was reprimanded by her employer for intermittently and briefly nodding off during staff meetings. Respondent states that in January of 2012 she sought an evaluation by David Michalak, M.D., which resulted in a diagnosis of Narcolepsy. Regarding the conduct outlined in Finding of Fact Number Eight (8), Respondent denies purposefully ingesting the medication and her only explanation is that she accidentally ingested her husband's prescription Soma.
10. The Board finds that there exists serious risks to public health and safety as a result of impaired nursing care due to intemperate use of controlled substances or chemical dependency.
