In the Matter of Registered Nurse                                   §     AGREED  
License Number 553326   §  
issued to ERNA JEANNE BEAVER                                       §     ORDER

An investigation by the Texas Board of Nursing, hereinafter referred to as the Board, produced evidence indicating that ERNA JEANNE BEAVER, hereinafter referred to as Respondent, Registered Nurse License Number 553326, may have violated Section 301.452(b)(10)&(13), Texas Occupations Code.

An informal conference was held on April 5, 2011, at the office of the Texas Board of Nursing, in accordance with Section 301.464 of the Texas Occupations Code.

Respondent appeared in person. Respondent was represented by Joyce Stamp Lilly, Attorney at Law. In attendance were Mary Beth Thomas, PhD, RN, Director of Nursing, Executive Director's Designee; John F. Legris, Assistant General Counsel; Anthony L. Diggs, MSCJ, Director, Enforcement Division; and J. L. Skylar Caddell, RN-BC, Legal Nurse Investigator.

FINDINGS OF FACT

1. Prior to the institution of Agency proceedings, notice of the matters specified below in these Findings of Fact was served on Respondent and Respondent was given an opportunity to show compliance with all requirements of the law for retention of the license(s).
2. Respondent waived notice and hearing, and consented to the entry of this Order.
3. Respondent is currently licensed to practice professional nursing in the State of Texas.
4. Respondent received an Associate Degree in Nursing from Abraham Baldwin Agricultural College, Tifton, Georgia, on June 6, 1970. Respondent was licensed to practice professional nursing in the State of Georgia on June 5, 1972, and was licensed to practice professional nursing in the State of Texas on July 31, 1989.

5. Respondent's nursing employment history includes:

1970 - 1973	Staff Nurse	Palmyra Pack Hospital Albany, Georgia
1973 - 1978	Staff Nurse	Winter Haven Hospital Winter Haven, Florida
1978 - 1979	Staff Nurse	Palmyra Park Hospital Albany, Georgia
1980 - 1981	Staff Nurse	Wake Medical Center Raleigh, North Carolina
1981 - 1988	Staff Nurse	Joan Glancy Hospital Deluth, Georgia
1989		Unknown
1990 - 2009	Staff Nurse	Conroe Regional Medical Center Conroe, Texas
2010 - Present	Staff Nurse	Nexus Speciality Hospital The Woodlands, Texas

6. At the time of the initial incident, Respondent was employed as a Staff Nurse with Conroe Regional Medical Center, Conroe, Texas and had been in this position for seventeen (17) years.
7. On or about August 3, 2007, while employed as a Staff Nurse in the Criticial Care Unit at Conroe Regional Medical Center, Conroe, Texas, Respondent failed to detect and then further assess and intervene regarding changes in the status of Patient Number BH00376448, who earlier that day had undergone left carotid artery bypass surgery, after Respondent documented in her initial assessment that the patient's condition may have changed, including that the patient had what appeared to be new onset dysphagia and diminished breath sounds in the upper and middle lobes of his right lung. Instead, Respondent medicated the patient with Ativan for anxiety one (1) hour after completing her initial assessment, and, over the next hour, failed to assess the apparent ineffectiveness of the Ativan as both the patient's blood pressure and pulse rate increased while the blood oxygen level declined. Once Respondent noted an obvious change in the patient's respiratory status, she increased the oxygen being administered, obtained the patient's arterial blood gases, and notified the physician; however, five (5) minutes later the patient went into full cardiac and respiratory arrest and a code was called. One of the physicians who responded noted that the patient had a tracheal deviation to the right, which had not been present when Respondent completed her initial assessment of the patient. The patient was resuscitated within twenty

- (20) minutes; however, less than one (1) week later it was determined that the patient had suffered an anoxic brain injury with respiratory failure, most likely due to upper airway obstruction with neck swelling and hematoma. On August 21, 2007, the patient was discharged to hospice and later died.
8. On or about June 29, 2009, through June 30, 2009, while employed as a Staff Nurse in the Critical Care Unit at Conroe Regional Medical Center, Conroe, Texas, Respondent failed to re-assess the arterial blood gases (ABG) of Patient Number BH00662377 after new settings were implemented for the patient's Bilevel Positive Airway Pressure treatments and after Respondent later increased the rate of oxygen delivery twice. Respondent did not document the physician's order to increase the oxygen, failed to notify the charge nurse that she had increased the rate of oxygen delivery in response to declines in the patient's blood oxygen level, and failed to notify the physician and charge nurse that she had re-attached the patient's temporary pacemaker when his heart rate declined significantly. Instead, Respondent continued to medicate the patient repeatedly with Morphine and Ativan for agitation. When the charge nurse checked on the patient two (2) hours before end of the shift, she found him obtunded with low blood pressure, an elevated respiratory rate, and further decreased blood oxygen level. Physicians were notified and the patient was intubated and stabilized, but his condition continued to decline over the next two (2) weeks into multisystem failure, and he died after several days of aggressive treatment.
  9. In response to the incidents in Findings of Fact Numbers Seven (7) and Eight (8), Respondent states that she was carefully monitoring the condition of Patient Number BH00376448 and that she responded appropriately to the crisis when it occurred. Regarding Patient Number BH00662377, Respondent acknowledges that she did not notify the charge nurse of the patient's condition and that she failed to do a follow up ABG, stating that, although there was no excuse for those omissions, they were uncharacteristic of her practice. Respondent states that she would always get an order from a physician to increase the oxygen in this type of situation and indicates that she must not have documented the physician's order. Regarding the pacemaker, Respondent states that she re-initiated its use because the Critical Care Unit operates under ACLS (Advanced Cardiac Life Support) protocol, which states that, when indicated, the re-initiation is to be done without hesitation and without the necessity of first obtaining a physician's order. Respondent points out that her performance evaluations during her tenure at the facility since 1990 routinely characterized her as being an excellent nurse with safe, prudent Critical Care Unit skills, who was well respected by both physicians and nursing peers as a consistently exceptional, solid performer, and whose caring and compassionate care became the backbone of the night shift so that she was looked up to as a resource for new nurses.
  10. The Board finds that the physician for Patient Number BH00662377, Stephen P. Maniscalco, MD, wrote and submitted a letter to the Board regarding Respondent and Respondent's care of the patient. Regarding Respondent, Dr. Maniscalco stated that her nursing skills are of the highest quality and she has a broad range of critical care knowledge that has helped her take care of some of the sickest of the sick with good outcomes. Regarding Patient Number BH00662377, Dr. Maniscalco states that the patient was considered a very high risk patient for cardiac surgery who had no other options available to treat his significant heart disease. He also had severe chronic obstructive pulmonary disease (COPD) and, after long discussions with him, he elected to proceed with surgery. According to Dr. Maniscalco, the patient succumbed to respiratory failure from his severe COPD that could not be medically treated.

CONCLUSIONS OF LAW

1. Pursuant to Texas Occupations Code, Sections 301.451-301.455, the Board has jurisdiction over this matter.
2. Notice was served in accordance with law.

4.
