

Respondent's professional nursing employment history continued:

08/99 - 03/09	RN	Shriner's Hospital for Children Galveston, Texas
05/09 - 06/11	RN	University of Texas Medical Branch Galveston, Texas
07/11 - Present	Unknown	

6. At the time of the initial incident, Respondent was employed as a registered nurse with the University of Texas Medical Branch, Galveston, Texas, and had been in this position for one (1) year and ten (10) months.
7. On or about March 1, 2011 to June 7, 2011, while employed with the University of Texas Medical Branch, Galveston, Texas, Respondent removed twelve (12) Hydrocodone 5/325 tablets, three (3) Morphine 4mg/1ml syringes, five (5) Morphine 2mg/1ml syringes, one (1) Tylenol #3 30mg tablet, and one (1) Alprazolam 0.5mg tablet from the Medication Dispensing System (Pyxis) for patient ID numbers 108795Q, 232220N, 716758Q, 777695P, 635806P, 223131N, 591249P, and 774526P, but failed to document, or accurately and completely document the administration of the medications in the patients' Medication Administration Records (MARs) and/or Nurse's Notes. Respondent's conduct was likely to injure the patients in that subsequent care givers would rely on her documentation to further medicate the patients which could result in an overdose, and Respondent's conduct placed the hospital in violation of Chapter 481 (Controlled Substances Act) of the Texas Health and Safety Code.
8. In response to Finding of Fact Number Seven (7), Respondent states:

"Yes, I did fail to accurately document administration of medication given to my patients; I did chart the pre/post assessment of pain on EPIC based on the patient's finds....Every time I removed medication from the pyxis system, I did administer it to the patient."
9. On or about March 1, 2011 to June 7, 2011, while employed with the University of Texas Medical Branch, Galveston, Texas, Respondent removed twelve (12) Hydrocodone 5/325 tablets, three (3) Morphine 4mg/1ml syringes, five (5) Morphine 2mg/1ml syringes, one (1) Tylenol #3 30mg tablet, and one (1) Alprazolam 0.5mg tablet from the Medication Dispensing System (Pyxis) for patient ID numbers 108795Q, 232220N, 716758Q, 777695P, 635806P, 223131N, 591249P, and 774526P, but failed to follow the facility's policy and procedure for wastage of the unused portions of the medications. Respondent's conduct left medications unaccounted for, was likely to deceive the hospital pharmacy, and placed the pharmacy in violation of Chapter 481 (Controlled Substances Act) of the Texas Health and Safety Code.

10. In response to Finding of Fact Number Nine (9), Respondent states:

"Never have I had a problem with documentation on the job until this incident. I was accused of stealing or taking the drugs. I volunteered to do a drug test three times but no one took me seriously."

11. On or about November 12, 2012, Respondent underwent a Psychological Evaluation with Kit W. Harrison, Ph.D., wherein Dr. Harrison advised the following:

"Respondent currently does not provide evidence of an active chemical dependency or alcohol problem. She may present with some disregard for social conventions and noted characterological issues which, coupled with situational stress, could reduce motivation and concern for careful documentation and strict adherence to procedural requirements. Whether she was misappropriating medication at the time of the allegations is outside her scope of the present assessment. The medical necessity of her current pain medication is deferred to her treating physician. She did not demonstrate adverse side effects at the time of the evaluation. Respondent may wish to seek better management of her stress and adjustment problems through counseling. The dysthymic mood can be addressed with counseling and antidepressant medication."

12. The Board finds that there exists serious risks to public health and safety as a result of impaired nursing care due to intemperate use of controlled substances or chemical dependency.
