BEFORE THE TEXAS BOARD OF NURSING

In the Matter of § AGREED
Registered Nurse License Number 227818 §
issued to BETTY J. CALCOTE MARTIN § ORDER

On this day the Texas Board of Nursing, hereinafter referred to as the Board, considered the matter of BETTY J. CALCOTE MARTIN, Registered Nurse License Number 227818, hereinafter referred to as Respondent.

Information received by the Board produced evidence that Respondent may be subject to discipline pursuant to Section 301.452(b)(10)&(13), Texas Occupations Code. Respondent waived notice and hearing and agreed to the entry of this Order approved by Katherine A. Thomas, MN, RN, FAAN, Executive Director, on October 24, 2016.

FINDINGS OF FACT

1. Prior to the institution of Agency proceedings, notice of the matters specified below in these Findings of Fact was served on Respondent and Respondent was given an opportunity to show compliance with all requirements of the law for retention of the license(s).
2. Respondent waived notice and hearing, and agreed to the entry of this Order.
3. Respondent's license to practice as a professional nurse in the State of Texas is in current status.
4. Respondent received an Associate Degree in Nursing from San Angelo State University, San Angelo, Texas, on July 1, 1972. Respondent was licensed to practice professional nursing in the State of Texas on November 16, 1972.
5. Respondent's complete nursing employment history is unknown.
6. On or about January 14, 2016, while employed as a Charge Nurse on the Acute Rehabilitation Unit of Peterson Regional Medical Center, Kerrville, Texas, Respondent failed to read the Medication Administration Record (MAR) of Patient Medical Record

Number JH M639724 or call the physician for clarification when the primary nurse for the patient asked her if she should administer 2,000 ml of Normal Saline (NS) specified to be run "wide open for dialysis," and at what rate. Respondent instructed the nurse to check the MAR and the doctor's order, and administer the NS at 100 ml/hour at first and to increase the rate as tolerated. The patient was on fluid restrictions of 1,500 mls per day, was scheduled for dialysis that evening, and the NS was intended for use only during dialysis for priming and rinsing the pump. Respondent's conduct exposed the patient unnecessarily to suffering a risk of harm from harm of fluid overload, as the patient did not have functioning kidneys.

7. In response to the incident in Finding of Fact Number Six (6), Respondent states that the patient's primary nurse came to her about 1 pm and said that the patient had an order for two (2) liters of NS to be infused wide open. Respondent relates that the nurse asked her if she should run the NS wide open or slower. Respondent indicates that she told her to check the MAR and the doctor's order to make sure how the order is written, and check with the dialysis doctors for clarification of the order. Respondent states she also told her that it sounded like a dialysis order, but if it was ordered wide open, since the patient is on fluid restrictions (1500 mls per 24 hours), please set the rate at 100 mls per hour to assess the patient's tolerance and monitor vital signs before increasing the rate. Respondent explains that in retrospect she realized that she made an error in judgement, and that she should have phoned the physician herself. Respondent states that the patient was monitored that afternoon, and he received his scheduled dialysis two (2) to three (3) hours after the start of the NS infusion, and there was no harm: His vitals remained stable and he remained asymptomatic.

CONCLUSIONS OF LAW
