10/14 - 01/17            LVN            Maxim Healthcare Services  
Fort Worth, Texas

02/17 - Present        Unknown

6. At the time of the initial incident, Respondent was employed as a Licensed Vocational Nurse with Maxim Healthcare Services, Fort Worth, Texas, and had been in that position for two (2) years and three (3) months.
7. On or about December 5, 2016, and December 6, 2016, while employed as a Licensed Vocational Nurse with Maxim Healthcare Services, Fort Worth, Texas, Respondent failed to notify the charge nurse and/or physician that Patient Medical Record Number 62190 had a change in condition, including, but not limited to: elevated temperature, elevated heart rate, and no urine output. Subsequently, Patient Medical Record Number 62190 was transported to the hospital where the patient expired six (6) days later. Respondent's conduct deprived the patient's physician of information needed to institute appropriate medical interventions and may have contributed to the patient's subsequent demise.
8. In response to Finding of Fact Number Seven (7), Respondent states on Monday, December 5th she arrived at work and received report from the patient's mom informing her that the patient had been given Tylenol for fever last night. Respondent further states that as the day went on, the patient didn't have any urine output and she reported this to the patient's mom. Respondent states that the patient's abdomen was not distended, and she repositioned the patient to try and stimulate her to urinate. Respondent states she reported to the patient's mom frequently that the patient had no urine output each time she checked her diaper and that she (mom) needed to call the doctor. Respondent further states the next morning she received report from the patient's mom and was told that the patient's dad changed a wet diaper last night; however, the diaper was dry at the beginning of her shift and had not been changed since last night. Respondent states that the patient's mom said she would talk with the patient's dad and take the patient to Cook Children's Emergency Room when he got home. Respondent further states the patient slept most of the day, her lungs were clear, and she medicated the patient once for temperature elevation. Respondent states she tried numerous times to get the patient's mom to contact one of the patient's doctors.
