BEFORE THE TEXAS BOARD OF NURSING

In the Matter of § AGREED ORDER
Registered Nurse License Number 679042 §
issued to ARNOLD ROBERT AC ABERNATHY §
§

On this day the Texas Board of Nursing, hereinafter referred to as the Board, considered the matter of ARNOLD ROBERT AC ABERNATHY, Registered Nurse License Number 679042, hereinafter referred to as Respondent.

Information received by the Board produced evidence that Respondent may be subject to discipline pursuant to Section 301.452(b)(10)&(13), Texas Occupations Code.

Respondent waived notice and hearing and agreed to the entry of this Agreed Order approved by Katherine A. Thomas, MN, RN, FAAN, Executive Director, on October 30, 2019.

FINDINGS OF FACT

1. Prior to the institution of Agency proceedings, notice of the matters specified below in these Findings of Fact was served on Respondent and Respondent was given an opportunity to show compliance with all requirements of the law for retention of the license(s).
2. Respondent waived notice and hearing, and agreed to the entry of this Agreed Order.
3. Respondent's license to practice as a professional nurse in the State of Texas is in current status.
4. Respondent received an Associate Degree in Nursing from Vernon College, Vernon, Texas, on May 11, 2001. Respondent was licensed to practice professional nursing in the State of Texas on July 17, 2001.
5. Respondent's nursing employment history includes:

7/2001 – Present	Registered Nurse	North Texas State Hospital Vernon, Texas
------------------	------------------	---

6. At the time of the incident, Respondent was employed as a Registered Nurse with North Texas State Hospital, Vernon, Texas, and had been in that position for twenty-two (22) years.
7. On or about April 11, 2018, while employed as a Registered Nurse with North Texas State Hospital, Vernon, Texas, and assigned to the Behavioral Management Treatment program, Respondent failed to accurately and completely assess and/or document the assessment of patient R.N. Additionally, Respondent falsified the patient behaviors and response exhibited on the restraint release assessment. Respondent's conduct resulted in an inaccurate medical record and was likely to injure the patient in that subsequent care givers would not have complete information on which to base their care decisions.
8. On or about April 11, 2018, while employed as a Registered Nurse with North Texas State Hospital, Vernon, Texas, and assigned to the Behavioral Management Treatment program, Respondent caused neglect to patient R.N. by authorizing transportation of the patient from the quiet/seclusion room without an assessment of the patient to determine if this was appropriate. Furthermore, Respondent failed to ensure the patient maintained 1:1 continuous observation when he authorized the patient to be taken to his room. Additionally, Respondent failed to assess the patient to ensure the patient was awake. Respondent's conduct exposed the patient unnecessarily to risk of harm in that failure to assess patient resulted in the patient not getting the care he needed.
9. In response to Finding of Fact Numbers Seven (7) through Eight (8), Respondent states being a nurse he cannot stress the importance of accurate and timely communication between caregivers. Respondent states false information given to a caregiver can lead to delay of patient treatment and possibly an adverse event. Respondent states at the time he released client R.N. he instructed PNA RR to stay with the client until he awakens. Respondent states he did give the PNA approval to assist the client to his bed area. Respondent states PNA RR was assigned 1:1 observation at that time and should have continued to observe the client until he awoke and could be re-assessed by the RN. Respondent states he was not aware that PNA RR did not stay with his assigned 1:1 observation, and had in fact shut the client's door so the client could not be visualized by staff. Respondent states at no time was he notified that the client was in distress. Respondent states at the time it was reported to him that client was asleep, his assessment revealed no signs of distress. Respondent states he was unaware that client had been asleep for one hour prior to the time he released him.
