AGREED ORDER

On this day the Texas Board of Nursing, hereinafter referred to as the Board, considered the matter of JESSICA ANN SHAULIS, Vocational Nurse License Number 349708, hereinafter referred to as Respondent.

Information received by the Board produced evidence that Respondent may be subject to discipline pursuant to Section 301.452(b)(10)&(13), Texas Occupations Code.

Respondent waived notice and hearing and agreed to the entry of this Agreed Order approved by Katherine A. Thomas, MN, RN, FAAN, Executive Director, on May 30, 2020.

FINDINGS OF FACT

1. Prior to the institution of Agency proceedings, notice of the matters specified below in these Findings of Fact was served on Respondent and Respondent was given an opportunity to show compliance with all requirements of the law for retention of the license(s).
2. Respondent waived notice and hearing, and agreed to the entry of this Agreed Order.
3. Respondent's license to practice as a vocational nurse in the State of Texas is in current status.
4. Respondent received a Certificate in Vocational Nursing from Grayson County College, Denison, Texas, on July 1, 2019. Respondent was licensed to practice vocational nursing in the State of Texas on August 19, 2019.
5. Respondent's nursing employment history includes:

8/2019

Unknown

Respondent's nursing employment history continued:

9/2019- 10/2019	Licensed Vocational Nurse	Meadow Brook Care Center Van Alstyne, Texas
11/19-Present	Unknown	

6. At the time of the incident, Respondent was employed as a Licensed Vocational Nurse with Meadow Brook Care Center, Van Alstyne, Texas, and had been in that position for one (1) month.
7. On or about October 22, 2019, through October 24, 2019, while employed as a Licensed Vocational Nurse with Meadow Brook Care Center, Van Alstyne, Texas, Respondent failed to intervene when she noted that Patient WW had bleeding from his penis and that there was blood in his Foley Catheter drainage bag. Additionally, Respondent failed to notify the patient's physician and family of the change in condition, and failed to document the finding in the patient's medical record. Subsequently, the patient was sent to see a urologist, where upon his arrival he was unresponsive and Emergency Medical Services was called. The patient was transported to the hospital where he was intubated and admitted to the Intensive Care Unit with urosepsis and septic shock. The patient expired the following day from hemorrhagic shock. Respondent's conduct was likely to injure the patient from lack of appropriate nursing and medical care, including possible demise.
8. In response to the incident in Finding of Fact Number Seven (7), Respondent reports that the patient had a catheter and an open area on his behind. Respondent states that she had to change the dressing on each shift that she worked. Respondent reports that she had to change his brief and clean him, and that it looked like the patient had been laying in feces for quite some time because it was always dried to his skin. Respondent states that she needed to do this before changing the dressing. Respondent states that the catheter was taut and covered with feces each time she changed the patient. Respondent reports that the aid that worked the shift with her never changed him. Respondent states that when she changed the patient there would be blood coming from the penis, about a teaspoon full, and that she assumed this was because the catheter was never secured to the patient's leg. Respondent states that the tubing was always ran through the patient's pant leg and then hung on the bed. Respondent states that the patient would tell her that the catheter was pulling and that it hurt. Respondent states that the patient was alert, and never had a fever indicating infection. Respondent states that when she arrived for her shift, she was never notified through report from the day nurse that anything was wrong with the patient. Respondent states that she is not sure if the day shift was ever aware anything was wrong with the patient. Respondent states that she should have not assumed that the bleeding was caused from the catheter tubing being so taut. Respondent states that she takes responsibility for her actions.
