AGREED ORDER

On this day the Texas Board of Nursing, hereinafter referred to as the Board, considered the matter of JAMES RICHARD GRONER JR, Vocational Nurse License Number 231054, hereinafter referred to as Respondent.

Information received by the Board produced evidence that Respondent may be subject to discipline pursuant to Section 301.452(b)(10)&(13), Texas Occupations Code.

Respondent waived notice and hearing and agreed to the entry of this Agreed Order approved by Katherine A. Thomas, MN, RN, FAAN, Executive Director, on May 20, 2021.

FINDINGS OF FACT

1. Prior to the institution of Agency proceedings, notice of the matters specified below in these Findings of Fact was served on Respondent and Respondent was given an opportunity to show compliance with all requirements of the law for retention of the license(s).
2. Respondent waived notice and hearing, and agreed to the entry of this Agreed Order.
3. Respondent's license to practice as a vocational nurse in the State of Texas is in current status.
4. Respondent received a Certificate in Vocational Nursing from Brightwood College, San Antonio, Texas, on August 13, 2010. Respondent was licensed to practice vocational nursing in the State of Texas on October 7, 2010.
5. Respondent's nursing employment history includes:

10/2010 – 11/2016 Unknown

Respondent's nursing employment history continued:

12/2016 - 6/2020	Licensed Vocational Nurse	The Rio at Mission Trails New Braunfels, Texas
6/2020 – 11/2020	Licensed Vocational Nurse	Golden Estates Nursing Home San Antonio, Texas
12/2020 – Present	Unknown	

6. At the time of the incident, Respondent was employed as a Licensed Vocational Nurse with Golden Estates Nursing Home, San Antonio, Texas, and had been in that position for five (5) months.
7. On or about November 10, 2020, while employed as a Licensed Vocational Nurse with Golden Estates Nursing Home, San Antonio, Texas, Respondent failed to timely assess vital signs and recognize a change in patient condition when Patient RF was found without a nasal cannula on and the patient's family asked Respondent to check vitals at 0441. Specifically, the patient was receiving supplemental oxygen support for shortness of breath and COVID-19 positive status. Respondent returned to the patient's room approximately thirty (30) minutes later to check patient's oxygen saturation and the patient was not moving or breathing, per video footage. When the patient's family requested that Respondent try to wake the patient up, via two-way video and speaker, the patient was unresponsive to sternal rub. The patient was pronounced deceased by a registered nurse at 0528. Additionally, Respondent failed to completely and accurately document assessments or interventions performed in response to the change of condition. Respondent's conduct resulted in an incomplete and inaccurate medical record, and was likely to injure the patient in that changes in the patient's respiratory status may have gone undetected and prevented a timely intervention.
9. In response to the incident in Finding of Fact Number Seven (7), Respondent states that the oxygen was properly set-up at the correct rate, the oxygen generator was functioning properly, had unrestricted flow, and the oxygen feed line to the patient's nasal cannula was correctly connected and inserted into the patient's nares. Respondent reports that prior to inserting the nasal cannula into the patient's nares he felt oxygen flowing from the nasal cannula and it was unimpeded. Respondent states that he ensured the placement of the nasal cannula by checking how resistant it was to being removed by patient, by tugging on the nasal cannula. Respondent states that he measured SpO2 with pulse oximeter unit and reviewed the results adjusting the oxygen generator setting if necessary Respondent states that at all times these issues were addressed by himself and the nurse on duty. Respondent states that the patient was observed by himself at two (2) hour intervals or less. Respondent states that when he did not observe the patient, the certified Nursing Assistant (CNA) was instructed to do so and she was thoroughly briefed as to what was to be done and what time increments she should be doing so. Respondent states that it was noted that the patient

removed his nasal cannula frequently, so the CNA was instructed to physically check installation of the nasal cannula by touching and tugging on it, and adjust if needed.
